**All RR Donnelley Print Facilities in the US & Canada Have Achieved
Forest Stewardship Council Certification**

Scientific Certification Systems Issues Multi-Site Chain-of-Custody Certificate

Emeryville, CA -- July, 31 2006 -- Scientific Certification Systems (SCS) announces the Forest Stewardship Council (FSC) chain-of-custody certification of all remaining RR Donnelley Print facilities in the United States (US), as well as nine facilities in Canada. RR Donnelley can now offer all customers another opportunity to demonstrate their commitment to responsible forest management by using FSC-certified papers and displaying the coveted FSC logo.

“By achieving certification of its complete complement of United States and Canadian print facilities,” says Dr. Robert J Hrubes, SCS senior vice president, “RR Donnelley is demonstrating another way that the printing industry can support the sustainable use of natural resources. We applaud the company for its leadership.”

To achieve FSC chain-of-custody certification, a supplier must have a verifiable traceability system ensuring that paper used in printed products originates from a FSC certified well-managed forest. RR Donnelley has more than 80 FSC-certified facilities in the US, Canada, and Mexico.

“Having certified the balance of our print facilities in the US and Canada,” says Michael Manzella, vice president of Environmental Health and Safety for RR Donnelley, “we not only deepen our commitment to environmental stewardship, but we give our customers another way to demonstrate that commitment to their clients.”

About Scientific Certification Systems

SCS is an independent certifier of environmental, food quality and food purity claims. Over two decades, SCS has developed internationally recognized standards and certification programs aimed at spurring the highest level of environmental and quality performance. Its programs span a wide cross-section of the economy, recognizing accomplishments in the fields of agricultural production, food processing and handling, forestry, fisheries, energy, green building, consumer and business product manufacturing, and retail. As an accredited certification body of the FSC, SCS has certified over 23 million acres of natural forests and plantations, and over 500 chain-of-custody operations. For more information about SCS, visit www.scscertified.com or call 510-452-8000.

About FSC

FSC is a nonprofit organization devoted to encouraging the responsible management of the world's forests. FSC sets high standards that ensure forestry is practiced in an environmentally responsible, socially beneficial, and economically viable way. Landowners and companies that sell timber or forest products seek certification as a way to verify to consumers that they have practiced forestry consistent with FSC standards. Independent certification organizations are accredited by FSC to carry out assessments of forest management to determine if standards have been met. There are currently 60-million acres of FSC-certified forestland in North America and 190-million acres globally. For more information, please visit www.fscus.org. ###
