

Spray safe with LiQuifix.  
**"Green" Spray Lube**

**L**iQuifix, a new multipurpose non-aerosol spray lubricant, is intended as an automotive, marine or household lubricant to eliminate squeaking, sticking, and binding. This ultra-thin film is nontoxic and long-lasting, has very low VOCs, and meets both California indoor air pollution standards, and FDA Regulation 21 CFR, so it's safe to use indoors, in gardens or around pets, says the maker. The only spray lube certified "green" by Scientific Certification Systems, it is mineral oil based, odorless, corrosion resistant and non-staining on fabrics. LiQuifix is NSF H1 registered as well.
