FOR IMMEDIATE RELEASE

SCIENTIFIC CERTIFICATION SYSTEMS ANNOUNCES MOVE TO ACCOMMODATE RAPID GROWTH

DEMAND FOR ENVIRONMENTAL CERTIFICATION INCREASES TEAM SIZE

December 7, 2010 - Emeryville, CA – Scientific Certification Systems (SCS), a third party verifier of environmental product claims, has announced that it will relocate to a larger office space in order to accommodate its rapidly expanding staff.

SCS has been a pioneer in the sustainability field since its inception in 1984. The company has grown its revenue 176 percent over the past 3 years and the staff grew from 31 to 85 employees. Inc Magazine and The San Francisco Business Times recently ranked SCS as one of the fastest growing companies in the nation and Bay Area, respectively.

“The increasing consumer demand for trustworthy claims about products’ environmental performance has forced us to expand rapidly. Our new office space will allow us to better serve companies that are building their brands with green marketing claims backed with scientific rigor,” said Stan Rhodes, President and CEO of SCS.

SCS will use its new office to showcase products that it has certified to rigorous environmental standards. These products include Indoor Advantage Gold certified Green Coat paint by Kelly-Moore and FloorScore® certified Excelon VCT flooring tiles from Armstrong.

In an effort to implement sustainable practices, SCS will use reusable containers for the move, and reuse furniture and preserve existing infrastructure where possible.

Effective December 6, 2010, SCS’ new address will be 2000 Powell Street, Suite 600 Emeryville, CA 94608.

###

Scientific Certification Systems (SCS) has been providing global leadership in third-party sustainability and [environmental certification](#), auditing, testing and standards development for more than 25 years. SCS programs span a wide range of industries, recognizing achievements in green building, product manufacturing, food and agriculture, forestry, retailing and more.
